1. Initializes cluster master node:

```
kubeadm init --apiserver-advertise-address $(hostname -i) --pod-network-cidr 10.5.0.0/16
```

2. Initialize cluster networking:

```
kubectl apply -f https://raw.githubusercontent.com/cloudnativelabs/kube-router/master/daemonset/kubeadm
-kuberouter.yaml
```
